

Purpose.

This Environmental policy reflects our commitment to environmental sustainability, regulatory compliance, and the continuous improvement of our practices to minimise environmental impact.

Application

All employees are responsible for implementing and adhering to this Environmental policy. The policy is supported by documented procedures, work instructions, and training programmes to ensure its effective implementation.

Scope

The scope of the environmental management system for Kallipr is 'A manufacturer and IoT solution provider specialising in designing, manufacturing, and selling IoT solutions and related services for water, wastewater, mining, energy, and rail industries, with a commitment to minimising environmental impacts.'

Objectives

Kallipr, an Internet of Things (IoT) manufacturer and solution provider, is committed to protecting the environment, preventing pollution, and ensuring sustainable practices in all areas of operation.

The ISO 14001 certified Integrated Management System (IMS) at Kallipr is designed to:

- Identify, manage, and reduce the environmental impacts of our operations, products, and services.
- Comply with applicable environmental regulations, standards, and legal requirements.
- Support the sustainable use of resources by minimising waste, conserving energy, and promoting recycling initiatives.
- Continuously improve environmental performance through data-driven decision-making and innovation.
- Foster a culture of environmental awareness and responsibility among employees and stakeholders.
- Engage with suppliers and partners to promote environmentally sustainable practices across the value chain.

The scope of our Environmental Policy extends to all aspects of our operations, including the design, manufacturing, sales, and support of IoT products and services. It applies to all employees, suppliers, and partners who contribute to our environmental management efforts.

Environmental Activities

To achieve the Environmental Policy, Kallipr will:

- Provide employees with appropriate training and resources to promote environmental responsibility.
- Monitor and assess environmental performance regularly, ensuring compliance with applicable standards.
- Identify and address environmental risks and opportunities proactively.
- Commit to reducing our carbon footprint and enhancing energy efficiency across operations.
- Promote continuous improvement by incorporating sustainable practices into our operations and product design.

Communication

This Environmental policy is communicated to all employees, partners, suppliers, and other relevant stakeholders. It is publicly available on our website to ensure transparency and accountability.

Compliance and Review

We commit to periodic review and improvement of our Environmental Policy. This policy will be reviewed annually by top management and updated as necessary to reflect changes in our business, environmental regulations, and industry best practices.

Implementation

All employees are responsible for implementing and adhering to this Environmental Policy. The policy is supported by documented procedures, work instructions, and training programmes to ensure effective application.

Accountability

All employees are accountable for their role in maintaining the IMS and achieving environmental objectives. Failure to meet environmental standards may result in corrective and preventive actions.
